

Reactor Interim Safe Storage Projects “Cocooning”

H Reactor

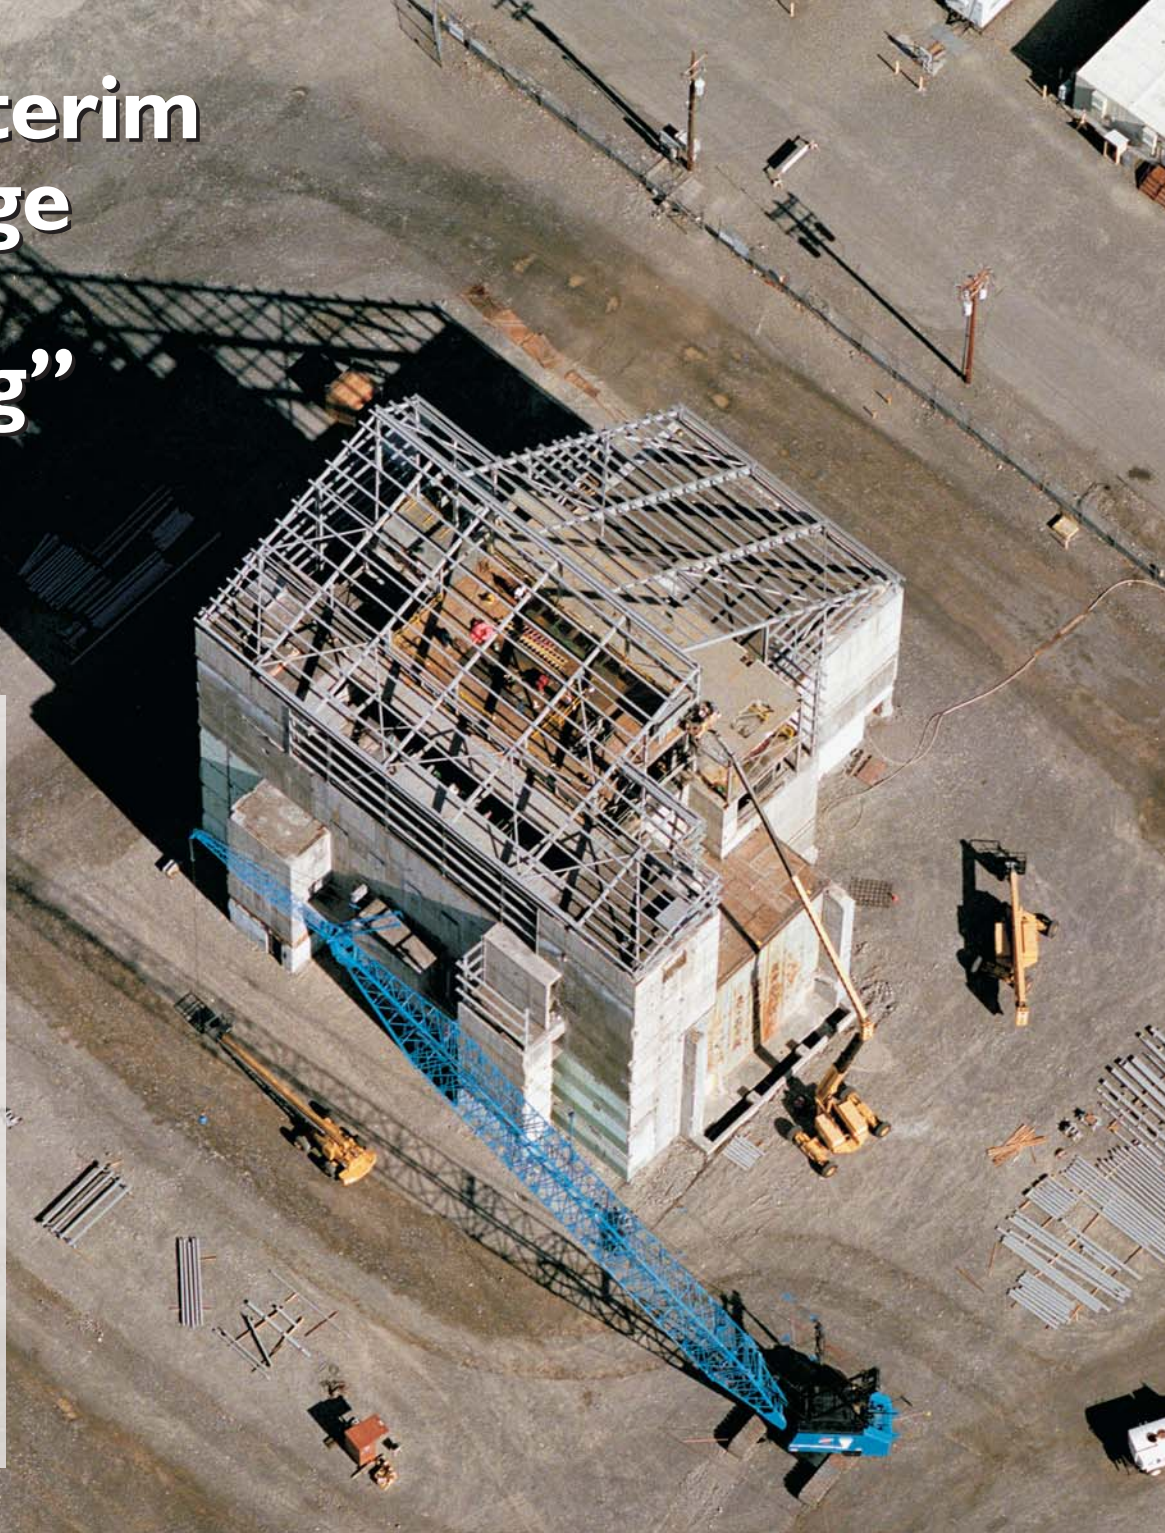

Cocooning completed
October 2005

H Reactor is shown here with new roof enclosure under construction. The demolition team reduced the reactor footprint by 80 percent. Only the thick concrete walls surrounding the reactor core remain.

Cleanup in the River Corridor

U.S. Department of Energy
Richland Operations Office

C Reactor
Completed in 1998

DR Reactor
Completed in 2002

F Reactor
Completed in 2003

D Reactor
Completed in 2004
