

## N Reactor

*N Reactor construction - 1959-1963*

*Operations ceased in 1987 and deactivation began in 1998*

*N Reactor, 2009. More than half of the 108 structures have been demolished.*

*The primary powerhouse facility for the area completed demolition on schedule in September, 2008.*

*The main ventilation stack for N Reactor was demolished with explosives in June, 2008.*

*Demolition of the Heat Exchanger Building, 2009*

*Conceptual drawing of cocooned N Reactor – complete by September 2012. When complete, 108 structures will be demolished and more than 150,000 tons of contaminated material will be transported away from the river.*
